About five thousand trend people have been
provided for during the past yea, facing been
funded transportation from this city to places
at which employment has been scenced for
them. It is slated in the Freedmen's Barcan circular, that amongst a population of 22,000 freed
people in the district, probably not more than
15,000 can obtain work at his wages, and the
colored people are invited to avail themselves of
the agency of the Bureau in gitting them transportation to points where they can be furnished
with employment.

The Times' Washington special says Mr. Slomp-

colored people are invited to avail themselves of the agency of the Bureau in gitting them transportation to points where they can be furnished with employment.

The Times' Washington special says Mr. Sloannaker, Collecter of the 1st District of Pennsylvania, about whose appointment so much strifte took place last spring, has come to givef. He has quarreled with those who were instrumental in obtaining his appointment, and will be probably succeeded by a competent men.

The Tribune's special says the Fourth Anditor has decided this after fifteen days from November 10, all chains filed by the same claimant through different belain agents shall be settled according to priority of filing and not according to the vote in lows will show the Republican majority in that State to be nearly 40,000.

The Tribune says the official textures of the vote in lows will show the Republican majority in that State to be nearly 40,000.

The Times intimates that the sale object of General Sherman's mission to Maxico, is to nid General Castleneau, sent out by the Emperor of France to superintend the canculation, by acting as the representative of this Government, posessed with multiority to discuss questions at Issue, and apeak for American Interests.

B. P. Spear, Acting Secretary of War for the Funiana, has beaued a circular urging the uccessity of having a therough military organization throughout the United Sentes and Toritories, and containing instructions for the forecasty means of defence of such citizens as will be tried there, and see without means of their own. A very large proportion of them are mere loys.

The World's special says: The Vice Consul General of the United States Government for the necessary means of defence of such citizens as will be tried there, and are without means of their own. A very large proportion of t

the fire is spied in populod's cities," Such a per forminge would be no novelly in Titusville, and gest that every one who wishes to see the exhibit tion "set up on his own book." It is not likely there will be any postponement on account of the weather. The limitation is between the 19th and the 15th of the present month.

There is a highly important suit before the Su Judges Strong, Reed, Thompson and Agnew are altting on the appent.

A. B. Funk, assignee, vs. Haldeman and other was fully argued, and excited much attention.

The counsel for appellants were Walter H. Lowrie, ex-Chief Justice, Thomas M. Marshall, pecially all stockholders in Dalzell, McElhenny onsolidated Petroleum Company of New York, Webster, People's Fountain, Oceanic, Northern Light and twenty other companies.

PRAT is said to exist in this county in inexhaustible quantities. It is found to abound in many places it is said the deposit is twenty or thirty feet deep. The land has hitherto been considered worthless. Peat is cheaper than coa or wood, and as there are no coal deposits, hereabouts, and wood for fuel is becoming scarce these pete bogs may yet become a mine o fwealth

Cleveland stating that the schooner Worthing ton, Captain Orr, for Cleveland, went ashore there Sunday night. In resening the crow, three men from the life-boat were drowned, sel was not hadly damaged. Crew saved.

The subject of reconstruction will be in abey-

ance until Congress meets, and meanwhile the vexed Mexican question presents itself with fresh prominence. Embassador Campbell, and General Sherman are on their way to a confer-ence at the Castle of San Juan De Ulton, with President Juarez, who seems to be in high and special power with our Government. Not Max. with his troops, guns and horses disembarking I Vera Cruz, with Napoleon to back him, confe do half as much to still the voice of faction, and the clash of arms in Mexico, as the unattended ence of these representatives of the United es. The selection of one of the heroes of tary view of the situation, and that it intends force, if necessary, by arms the terms upon ex. The conditions of this interference, as s hinted in Washington, are the cession by cico to the United States, of several of her provinces, abounding in mines and noble ropagate Republican Institutions, as it is to rove our commercial facilities on the Pacific. nd give American capital and enterprise a chance to speculate and develope their rust will exchange their lands for our protection, they will be cheaply bought by us, nor will the bar gain be a hard one for them.

By the treaty of Guadalupe Hidden Mexico eded to us in 1848, Upper California and a perion of New Mexico for the sum of fifteen mildon dollars, while the exports of gold alone rom San Francisco, consigned to the one city of New York for a single year-1853, amounted to iearly sixty millious.

Any government is better than none at all, and a President is far more acceptable to a people who have but a Republic in some form or other since 1821 with occasional lapses, than an Emperor imposed as Maximilian was by foreign bayonets. The main thing is to have a stable and strong government to suppress gacilla war fare, to protect life and property, and to encour age and reward the various industries.

There is one more stipulation that ought to be islated on by our Government, and incorporated in the Mexican Constitution, and that is religious Roman Catholic religion and prohibits the exercise of my other whatever. The nineteenth century demands more liberal views than these, especially should governments based upon the popular will guarantes religious liberty and freedom of con of Philadelphia. The cost of the schools last science to their subjects. Centuries ago, the Az' tee Empire stood a splendid fabric of power, be-fore the foot of the Paritan had pressed the rock of Plymouth. The Spaniard crossed the sea in the Catholic faith. At a later period the Angle Saxon fied from the iron hand of religious in-tolerance to find anasylum and to build a church in the wilderness of New England. The world knows the result, and the present should profit by the examples of the past.

Geography tells us the Mexicanarea Isalmost half ulation is exceeded by that of New York, Pounsyl vania and Ohio. Her history reads like rom thee; her runs speak of a givilization as mysterious as that of Egypt, and which still gleams with an oriental splendor. Her monuments were built by the genius of superstition. The mayder tells us of mule travel in monomials barrassed and beset land-capies, of the fabulous riches that slumber in her boson, of her half-breed ragamuski masses, of her dreamy-cyed and voluptions smooths promenading the alamada and of the houses of ter nobles rivaling the palace of Albadia. Put alien from us in religion, lineage and language, having none of the chivalric qualities that excite admination, nor the social or demostic virtues that enlist respect, we feel little curjosity about their condition, and little sympathy with their fortune or restortunes. Still we are impatient at her degeneracy and covel the treasures of her county, shouldered his rifle the other day and the Susquehanna, bound on a half military and vent into the woods and killed two deer and five half diplomatic adventure or mission, to Juraz, one of the rival chiefs, who is guthering up the reins of power which have failen from the weak hands of a foreign usurper. There is a reciety upon its institutions and of government upon society, and har mony and peace connot prevail

unless they are ad opted in each other.
Intelligence demands free-loss, and freedom necessitates intelligence. What Mexico wants President; but American born citizens to breathe into her social system a more vigorous life, and to quicken the dry bones of her decaying industry into a more fervent and progressive vitality. She wants the schoolmaster, the missionary, the merchant, the miner, the farmer, the speculator when we have absorbed the Isthmus of Tehuantepec, and the gold and silver fields of Sonora and Chiliushus, and when the Mexican Republie comes to exist only by our consent and poration of American elements with her national dimacter is not far dislant.

IMPORTANT SULL.—The Pittsburgh Gazette twists in their vanor wate. A luminous trainstant of the United States District Court, before Judge McCandless. It was four suits brought in equity, on motion for a preliminary injunction by K.A. L. Roberts, patentee of Roberts' Oil Well Tripudo. Action for infringement vs. Haman and Nickerson, of Franklin, Park, of Timsville, and Lenate of Meadville. Bakewell & Christy appeared for piaintiff, and Major A. M. Bruner and Swartzwelder for defendants.

The case of Haman and Nickerson was argued, and decision reserved, while that of Lenate was induced by the state of the meteors, coming though they do, with the productors counter linear lands and decision reserved, while that of Lenate was induced by reach our planet. In a solid in a minute, eyer reach our planet. In a solid in a minute, eyer reach our planet. In a solid in a minute, eyer reach our planet. In a solid in a minute, eyer reach our planet. In a solid in a minute, eyer reach our planet. In a solid. IMPORTANT SULE .- The Pittsburgh Gazette have made arrangements to have the fire bells lung, in order, as Raderiga said, "to well the equity, an motion for a preliminary injunction

and decision reserved, while that of Lengte was postponed for the pre-ent. Mr. Park being sat-isfled that the claims of the patentee were valid and first, consented that a decree be entered, and promised to desist from further infringement. ELOPEMBAT, ARREST AND ESCAPE.—The Clar

ion Ranner says a man and his wife were arrested in Brookville on Thursday of last week, having in their possession a pair of horses and carriage, alloged to have been stolen from J. S. Hart, of Bucks county, Pa. The guilt of the parties was thoroughly established; but as both the woman and the man pretended sickness, they were places in a room in the American House, where they were strictly watched. The man, however managed to escape, by letting himself down with sheets and quits tied together, and the woman remained, who was taken from her thed of sick pesser and lodged in Jail, The parties played their sick game neatly, and completely boodwinked the officers. The latter have learned :

T. H. BLACKWARD'S Richard Ball comes off or his hotel at Pleasantville this evening. From al the preparations that have been made, we have no doubt but that the guests will wish friend Black mare's birthday came every quarter. The Pittsfield Band will furnish music for the occasion.

Captain R. H. Lug, successor to C. P. Morse

lesson in sharp practice they will not soon forget.

Captain R. H. Luz, successor to C. P. Morse & Co., advertises in our columns this merning several varieties of coal, both for black milits, and the upproses. The Captain has all his coal carefully housed, and offers a good srifele at the market rates. See his advertisement.

If you wish a stove at coal, go to Smith & Hisbley's and get one of the Globe Heaters.

Hinkley's and get one of the Globe Heaters.

THE FAULING STARS.

The Expected Meteoric Shower of To--Analysis and Appearance of Erco-The New York World of Saturday has a very teresting article, on the meteoric shower ex pected to occur within the ensuing twenty-four it will probably be notlecable during the inter

mediate hours which end Tuesday and usher it Wednesday, between twelve o'clock of the 18th and three o'clock in the morning of the 14th Instant. Some wrial, if not celestial visitors are then due at our mundane hotel, and he who is on the watch will likely "see stars," falling stars, or the periodic return of the grand stellar shower, so enlied, which aroused science and scared the ignorant into the mortal fear that the waiting, on the 14th of November, 1833, very member the terror with which the phenomeno was then regarded. During the three hours of to be only waiting for sunrise, and long after the shower had ceased, the morbid and ignorant were of the sound conviction that the final arraignment was at least only a week shead. To zell now the Mayor of Philadelphia lowered himself down a well; how imprompts meetings for sought to have old debts settled, in order to earry a clear pecuniary balance into the expected eternity, and how the creditors insteted it "was no use to talk dollars" in the face of the general seenes of humor and terror, would take more space than the careful exhibition of the charac teristics, the incidents, the known causes, and the appearance of the great phenomenon will

THE COMING METEORIC SHOWER. The reason why the meteoric shower is attributed to between the 13th and 14th of November

less than nineteen great star-fallings are recordinterval from one stage of their occurrence to the next, and the next, and so on. The last one as stated, was on the 14th of November, 1833 as succe, was on the Fatto of Notember, issay, the preceding shower came off on the anne day 33 years before, and previous to that date in the same ratio of time. This funishes a data and a basis for astronomical ealeulation, and according to the conclusions of the Greenwich Observatory protessors, the next passage of the earth through the meleoric group will take place on the morning of Notember 14th, two hours before annulse. A watch on the early morning of the 18th is feed on the nearly morning of the 18th is feed on the predicted time. The theory that dates the occurrence of the grand shower on the morning of the 14th receives this further confirmation: There are two kinds of meteoric showers, periodle and sparadic, or accusional. The sporadic have always been most frequently notice able on the 18th of various Novembers, yearly, but they are not sufficiently imposing to take them out of the sphere of midiary astronomical phynomena i yet their occurrence on the 14th. third sporade increase in ease that every furty, third sporade increase a led to the calling of these large showers periodic; hence the classification. Mostly, these sporadic displays are now only specially noticed whea an unusual number of meteors full; otherwise, they are togeted as a matter of course. The most remarkable in recent years of these meteoric showers, was that which occurred on November 13th and 14th, 1865, when the maximum display at Greenwitch was 247 meteors per nour. The display this year is expected to be much greater—several hundred three greater—several hundred three greater—several hundred three greater—several on the contribution of the last periodic shower, off Boston, in 1833.

THE HISTORY AND PREORY OF PERRODIC METEOR

The term meteor signifies any phenomenon of The term meteor signifies any phenomenon of short duration occurring in the atmosphere. They are, of churse, thus various, such as meteors of rain, sanw, for, and hall, formed aqueous wither the effects produced by the passage of thee aqueous particles through the direct evaluation accepts. The phenomena of lightning, arollies, shooting stars, dee, are technically terminized in the same particles. But in best understood impaging the term meteor is applied only to those bodies that as globular five or shooting stats are now and then seen turling in space at unknown distances from the carth and in mishnown orbits. The test of their solidity appears from their occusionally throwing upon our certh's suctice frequents of stane, or 'motoor' bank, whose lest intense, and whose ascentained substance is composed of the following elements.

METEORIC SHOWERS WITHOUT BROLITES. Some of the most remarkable displays of me toric phenomena have been not companied with our the passage of avolute siones. The body of the metor, called the bolls, is a flery body pre-cipitated across the heavens, and ofton explodes with a lond mose, being no trace of solid ma-teriods in their van or wake. A laudinous train

they do, with the productous velocity of 350 miles in a minute, ever reach our planet in a solid state, but are dissipated in the atmosphere.

The nebular theory is that of Professor Olinical, of Tale, and of Arago. The latter suggests that the meteoric bodies constitute a stream in the form of an annulus zore, within which they pursue a common orbit; that there are several such streams which inverted, each at the own end and streams which in refect, each it is own ported, the earth's common orbit; and that through each the myriad of small cosmical bodies are briggitarly distributed, and that in our earth's possage-through the densect of these groups the most bulli our displays occur.

DITES OF THE MOST HAPINGARY SETFORIO PROWERS. Height miles on indeed of miles of mile 

THE SHOWER THIS WEEK. The beginning of this article stacks of the probable accurrence this week of the grand periodic meteoric shower of 1866, somewhere between twelve middinght of Tuesday and suntise of Wednesday. The astronomers have foreful its coming, and they generally are held as ruliable prophets. Of causes, every one will be on the tiptee of expectation. No one need be sourch. Science has demonatated the occur-

country where its repetition is to occur, may be esteemed an exaited julvilege. Just imagine, for extremed an exalted inivilege. Just imagine, for instance, the firmament visibly descending at middight, in globes of fire over the dark and roaring entaract of Niagara. The spectacle will be visible in this initiade, it is stated, and through the United States generally, in its best and grandest characteristics, about the hours before assued.

Tite creation of National banks has come to in end. The full smount of bonds upon which, by the limitation of the law, currency can be samul, has been received at the office of the Comptroller of the Currency. Three hundred millions of dollars is the sum specified, and in order to prevent parties ambitions of starting new banks from procuring disappointment to posits of bonds will be received.

THE FENIAN TRIALS at Toronto are fust now engrossing public attention, both among our own and the Canadian people. Regardless of the rights or wrongs of Fenianism in the abstract Americans are agreed that Judicial investigation is a farce and justice but a name in the provincial courts as far as Irlehmen are concerned. A rigid examination, however, will show that Stein & Phelps have a large and varied stock which they are selling at Eastern prices.

PREPARE FOR THANKSGIVING DAY, which you annot fully do unless you have for your kitchen first-class cook stove, such as may be purchase at very low figures at Bain & Copeland's. But whether you buy a cooking stove or not, he sure to get one of " Spear's Anti-dust Parlor Stoves," which are without doubt the most economical and the handsomest now to be had. Call and see the one in use at their store on Franklin

NOTICE TO THE MEMBERS OF WASHINGTO ing at the engine house, on Tuesday. November 13th 1866, at 2 o'clock precisely, to try the engine. By order of James Reardon, Foreman.

INSURE in the Mutual Life Insurance Company of New York, with B. N. MURRAY.

COAL .- After an experiment with Auntie Daster, Spear's patent stove, there are some par-tics in the city that have found that the price of coal is not \$4 per ton, for the coal dealers still continue to insist that they must have an eleve ollar bill for a ton of A No. 1 coal. Stoves are decidedly cheap this year. We don,t intend to sell stoves at cost, but will sell ten per cent. cheaper than any other parties in the city who

FINANCIAL AND COMMERCIAL

FINANCIAL. (BY TELEGRAPH.)

NEW YORK NOVEMBER 12.
The Commercial's money article says: The morning market shows a continuance of the extreme case as of Saturday. Some of the banks still sak 6 per cent, but eral rate on call loans is 5 per cent with an abus dant offering at that rate, and at 4 per cent on Govern ment columnate. There is a romewith liberal supply of paper in the market, and the petition for discounts tends to keep up the rates, 667 per cent being the current quitation for rime names. Foreign Exchange opens dult at a shade lower. The stock market is unsettled, and weak.

#### PRESENTATION PRACTES

Overce or the Moneing Hericu, ? Triesville, Novumber 12. The Petroleum Market is active and stendy, and with

The Petroleum Market is seive and stemly, and with-out change from our percloss quotations.

Petroleum is held at the following figures: On Pron-uer Kun at \$2.50 to \$5\tilde{e}\$ to \$4\$ gmilly delivered on the cars; for \$4.0 to \$5\tilde{e}\$ gmarkly, delivered on the care at \$3.00; on Bonnebud Run \$5\tilde{e}\$ to \$7\$ gmarkly \$8.00 at the wells; on the Stevenson Farm, \$5\tilde{e}\$ to \$7\$ gmarkly \$2.75 at the wells; for \$5\$ to \$7\$ gmarkly, \$2.55 at the wells; on Bull Run for \$5\tilde{e}\$ to \$7\$ gmarkly, \$2.75 at the wells.

wells. We have to report the following sales to-day: 600 bbis 45 to 46 gravity on Bennehoff Run at \$2.55 at the wells; 100 bbis 46 gravity on the McElleny Farm at \$2.55; 930 bbis on Ball Run 45 to 47 gravity at \$2.60; 800 bbis on the Stevenson Farm 45 to 50 gravity, for the Dieveland market at \$2 80 at the wells; 200 bbls on Proneer Run 49 gravily at \$2 50 at the wells: 600 blue Church Run 45 to 45 gravity at \$2 80 : 500 bblo Counter Adm is to a sparing at \$2.50; 500 bits on the Stovenson Farm 45 gravity at \$2.75 at the wells; 10 bits 43 gravity defivered in the arm at Figures 53 60. The following are our quotations to-day:

PITTSBURGH OIL MARKET. (Ppecial to the Moridiz Herabl.) Puttaneau, November 12.

There seems to be a disposition to return to the dumea in the Oil Market noticed just before the last rist times in the OH Market noticed just before the last just. There is just now a good supply of a rude on hand, but at the same time the refiners are well supplied, with but Bitle inquiry for Reflind OH. Taking these things into consideration in connection with the fact, that old-case are willing to ad as low as the, there appears to be a pruspect of choice between a dull market or another turnible in prices. At the rame time, it would not surprise us if prices held up firmly, or even advanced a shade in the centes of a week.

Crude—We note sales of 600 bbls at 10%c; 1,0% bbls at 11; 450 bbls at 11c.

The market may be quoted rather weak and dell at

The nurket may be quoted eather weak and dell at
